AMX Resin injection system with a 265 ml cartridge

Cellpack has launched a new resin injection cartridge for small applications. The cartridge is filled with 265 ml of our top-performing EGJ resin and it is applied easily using the hand press tool AMX-HPT 310. No pre-mixing is required before filling the box or joint.

Product benefits

- quick installation – no pre-mixing required
- mixing and injecting is done in one step
- safe and easy installation procedure
- practical and clean resin system for filling boxes and joints
- reclosable cartridge for later use of remaining resin

Application areas and properties

- for low voltage $U_0/U (U_m)$ 0.6/1 (1.2) kV
- in branch and connection boxes and joints
- indoor areas
- outdoor
- underground
- protection against moisture
- efficient and time-saving system

Quick and easy filling with the AMX Resin injection system.

Sturdy hand press tool with a precise static mixer.
