

COVID-19 Update

25th March 2020

PLP NZ - ESSENTIAL BUSINESS

We are available 24/7

In these unprecedented times, we have seen the Government announce the necessary steps to control the spread of COVID-19.

What does this mean for our Customers and PLP NZ?

PLP NZ manufacture and / or distribute products that are necessary for the continued and immediate operation of other **essential** infrastructure and businesses in energy, communications, oil and gas and hazardous environments.

We **remain open** with our ability to manufacture and source product supported by our 23 manufacturing operations in 21 countries and other 3rd party suppliers.

Stock levels inside our warehouses are well established, and we have full engineering, manufacturing capability on hand to produce specialty or urgent requirements.

We are here in full support as we ride out the storm together.
